

## Course Title: MOD4-MW320-Intrapartum Observation & Charting

**Credits:** 0.50

**Course Description:** This course reviews the observation and objective data that must be recorded at the appropriate intervals to obtain proper medical documentation of labor and delivery. Special topics such as how consults, transfers, consents and waivers are charted are also covered.

**Learning Objectives:**

- A: Student will be able to answer the Study Questions (below).
- B: Student will be able to demonstrate thorough knowledge of the Clinical Skills required for this course (below).
- C: Student will demonstrate thorough knowledge of the MANA Core Competencies for Midwives required for this course (below).
- D: Students will be able to demonstrate knowledge of any new information in the area of study.
- E. Student will be able to correctly use an Emergency Transfer Plan.

**Learning Activities:**

- I. Student Reads required texts.
- II. Student Completes study questions.
- III. Preceptor elaborates on study questions.
- IV. Clinical Skills and Core Competencies training consists of the following (may take place at clinical visits or at childbirth education classes):

1. Preceptor Explanation of	Safe, evidence-based midwifery care for the individual Clinical Skills and Core Competencies including etiology, sequelae, appropriate management and follow-up for the individual patient, appropriate times and reasons for consult and referral, access to relevant resources and information, complete, thorough and timely record keeping, appropriate, professional, and compassionate management of every task involved, receptiveness and responsiveness to patient's concerns. The Explanation will include a discussion of midwifery decisions and actions as they relate to possible outcomes and their wider impact, based on the Midwives Model of Care®.
2. Preceptor Demonstration of	
3. Student Practice of	
4. Student Demonstration of	

- V. Student researches and presents to the preceptor relevant latest developments in academic and clinical midwifery as relevant to the subject.
- VI. Student/Preceptor discussion.
- VII. Role-playing and Clinical Interactions: practice clinical interactions, assist with actual clinicals.

**Learning Materials / Resources:**

(Please use textbooks less than 5 years old, or most recent edition)

1. Frye, Anne. Holistic Midwifery: A Comprehensive Textbook for Midwives in Homebirth Practice, Vol. 2: Care of the Mother and Baby from the Onset of Labor Through the First Hours After Birth. Labrys Press. 2004.

2. Weaver, Pam and Evans, Sharon K. Practical Skills Guide for Midwifery, 4<sup>th</sup> Edition. Morningstar Publishing Co. Wasilla. 2007.
3. Sample of Preceptor's Emergency Transfer Plan used in her/his practice.
4. MEAC Abbreviated NARM Skills Form.
5. MANA Core Competencies for Midwives
6. Midwives Model of Care®.
7. Internet links as needed for latest developments in midwifery care:  
[The Cochrane Collaboration](#)  
[EBSCO](#)  
[National Library of Medicine](#)  
[PubMed](#)  
[Medline](#)  
[SCIRUS](#)  
[Medscape](#)  
[World Health Organization](#)

### **Evaluation Tools / Methods:**

1. Answers to study questions: Student must achieve at least 80% correct to pass. The preceptor evaluates each answer for correctness and explains the questions that were incorrect. This counts for 85% of the final grade.
2. Clinical Skills: Student must demonstrate thorough knowledge of each skill. This counts for 5% of the final grade. *Academic courses CAN be completed without the student achieving "mastery" of each skill, however the skills on the MEAC Abbreviated NARM Skills Form (which is a separate requirement) are not filled in until the student achieves Mastery\* of the skill.*
3. MANA Core Competencies: Student's ability to apply MANA Core Competencies for Midwives in discussion to simulated and real-life situations. This counts for 5% of the final grade.

Evaluation of NARM Skills and MANA Core Competencies: The student demonstrates thorough knowledge to the satisfaction of the preceptor in the following areas:

*The student will be able to, in accordance with safe, evidence-based midwifery care, explain the condition, verbalize etiology and sequelae, verbalize appropriate management for the individual patient, follow up appropriately, consult and refer appropriately, access resources and information, accomplish complete, thorough and timely record keeping, appropriately manage every task involved correctly, professionally, and compassionately, while being receptive and responsive to patient's concerns. She/he will be able to explain her decisions and actions as they relate to possible outcomes and their wider impact.*

4. Student presentation of new information in area of study. The preceptor evaluates the correctness of the information presented. This counts for 5% of the grade.
5. Student correctly uses an emergency transfer plan. This does not count towards the grade, but is a requirement to pass the course.

## Study Questions

1. Discuss the purpose of charting in labor.
2. Describe what observations, subjective data, assessments, and plans should be charted in labor and why.
3. Describe the timing of charting in labor and give the rationale.
4. Discuss the subjective, objective, and assessment data that are charted in the 3rd and 4th stages and why.
5. Describe how you can chart mother's and baby's data at the same time.
6. Explain the rationale for initialing the chart.
7. Discuss how the administration of any medications is charted.
8. Explain how consults on mother or baby's behalf are charted.
9. Discuss how a transfer is charted.
10. Explain how consents and waivers are obtained and charted.
11. Discuss the situations that require consents or waivers IP, and in 3rd and 4th stages.
12. Discuss when, if ever, it is advisable to chart information provided by or observed in persons who are not the mother or baby.
13. Define observational skills as they relate to intrapartum charting.

## Clinical Skills (NARM Skills)

### **I. Midwifery Counseling, Education and Communication**

- (1)-I A. Provides interactive support and counseling and/or referral services to the mother regarding her relationships with her significant others and other healthcare providers
- (2)-I B. Provides education, support, counseling and/or referral for the possibility of less-than-optimal pregnancy outcomes
- (3)-I C. Provides education and counseling based on maternal health/reproductive/family history and on-going risk assessment
- (4)-I D. Facilitates the mother's decision of where to give birth
- (5)-I E. Educates the mother and her family/support unit to share responsibility for optimal pregnancy outcome
- (6)-I F. Educates the mother concerning the natural physical and emotional processes of pregnancy, labor, birth and postpartum
- (7)-I G. Applies the principles of informed consent

- (8)-I H. Provides individualized care
- (9)-I I. Advocates for the mother during pregnancy, birth and postpartum
- I J. Provides education, counseling and/or referral, where appropriate for:
  - (10)-I J 1. Genetic counseling for at-risk mothers
  - (11)-I J 2. Abuse issues: emotional, physical and sexual
  - (12)-I J 3. Prenatal testing
  - (13)-I J 4. Diet, nutrition and supplements
  - (14)-I J 5. Effects of smoking, drugs and alcohol use
  - (15)-I J 6. Situations requiring an immediate call to the midwife
  - (16)-I J 7. Sexually transmitted diseases
  - (17)-I J 8. Complications
  - (18)-I J 9. Environmental risk factors
  - (19)-I J 10. Newborn care including normal/abnormal newborn activity, responses, vital signs, appearance, behavior, etc
  - (20)-I J 11. Postpartum care concerning complications and self-care

## **II. General Healthcare Skills**

- (21)-II A. Demonstrates Universal Precautions
- (22)-II B. Demonstrates the application of OSHA regulations as they relate to midwifery workplace
- (23)-II C. Demonstrates the application of aseptic technique
- II D. Demonstrates the use of instruments and equipment including:
  - (24)-II D1. Amnihat® /Amnicot®
  - (25)-II D 2. Bag and mask resuscitator
  - (26)-II D 3. Blood pressure cuff
  - (27)-II D 4. Bulb syringe
  - (28)-II D 5. Cord clamp and/or cord tape
  - (29)-II D 6. DeLee ® (or other tube/mouth suction device)
  - (30)-II D 7. Doppler and/or Fetoscope
  - (31)-II D 8. Gestation calculation wheel/calendar
  - (32)-II D 9. Hemostats
  - (33)-II D 10. Infant airway
  - (34)-II D 11. Lancets
  - (35)-II D 12. Newborn and adult scale
  - (36)-II D 13. Nitrazine paper
  - (37)-II D 14. Needle and syringe
  - (38)-II D 15. Scissors (all kinds)
  - (39)-II D 16. Single dose ampule
  - (40)-II D 17. Speculum
  - (41)-II D 18. Stethoscope
  - (42)-II D 19. Suturing equipment
  - (43)-II D 20. Tape measure
  - (44)-II D 21. Thermometer
  - (45)-II D 22. Urinalysis strips
  - (46)-II D 23. Urinary catheter
  - (47)-II D 24. Vacutainer/blood collection tube
  - (48)-II D 25. Vaginal culture equipment
- (49)-II E. Is trained in adult/infant CPR/neonatal resuscitation

(50)-II F. Uses alternate healthcare practices (non-allopathic treatments) and modalities

(51)-II G. Refers to alternate healthcare practitioners for non-allopathic treatments

II H. Treats for shock by:

(52)-II H 1. Recognizing the signs and symptoms of shock, or impending shock

(53)-II H 2. Assessing the cause of shock and providing treatment for shock

(54)-II I. Administers Oxygen

(55)-II J. Recommends the use of vitamin and mineral supplements

II K. Administers the following pharmacological (prescriptive) agents:

(56)-II K 1. Lidocaine

(57)-II K 2. Medical oxygen

(58)-II K 3. Methergine

(59)-II K 4. Prescriptive ophthalmic prophylaxis ointment (e.g., erythromycin)

(60)-II K 5. Pitocin ®

(61)-II K 6. RhoGam ®

(63)-II M. Uses Doppler

### **III. Maternal Health Assessment**

(65)-III A. Obtains and maintains records of health, reproductive and family medical history

(66)-III \*B. Performs an initial history and physical examination including vital signs

III C. Knows pelvic exam, including assessing:

(70)-III C 2. The size of the uterus and fetal age (by bimanual exam), the condition of the vulva, vagina, cervix, perineum and anus

(75)-III H. Evaluates laboratory and medical records from other practitioners

(77)-III J. Records results of the examination in the prenatal records

### **IV. Labor, Birth and Immediate Postpartum**

(93)-IV A. Facilitates maternal relaxation and provides comfort measures throughout labor

(94)-IV B. Evaluates and supports a laboring mother during the first stage of labor by assessing a variety of factors

(95)-IV C. Knows a variety of treatments for anterior/swollen lip

(96)-IV D. Demonstrates the ability to evaluate and support a laboring mother during the second stage of labor

IV E. Demonstrates the ability to recognize and respond to labor and birth complications such as:

(97)-IV E 1. Abnormal fetal heart tones and patterns

(98)-IV E 2. Cord prolapse

IV E 3. Variations in presentation such as:

(99)-IV E 3 a) Breech presentation

(100)-IV E 3 b) Nuchal hand, arm presentation

(101)-IV E 3 c) Nuchal cord presentation

(102)-IV E 3 d) Face and brow presentation

(103)-IV E 3 e) Multiple birth presentation and delivery

(104)-IV E 3 f) Shoulder dystocia

(105)-IV E 4. Management of meconium stained fluids

- (106)-IV E 5. Management of maternal exhaustion
- IV F. Assesses the condition of, and provides care for the newborn immediately after the birth by:
  - (107)-IV F 1. Making initial newborn assessment
  - (108)-IV F 2. Determining APGAR score
  - (109)-IV F 3. Monitoring respiratory and cardiac function
  - (110)-IV F 4. Responding appropriately to the need for newborn resuscitation
  - (111)-IV F 5. Clamping, cutting, and caring for the cord
  - (112)-IV F 6. Administering eye prophylaxis
  - (113)-IV F \*7. Performing a newborn examination
- IV G. Assists in placental delivery and responds to blood loss by:
  - (114)-IV G 1. Determining signs of placental separation
  - (115)-IV G 2. Facilitating the delivery of the placenta
  - (116)-IV G 3. After delivery, assessing the condition of the placenta
  - (117)-IV G 4. Estimating the amount of blood loss
  - (118)-IV G 5. Responding to uterine bleeding with a range of treatments
- IV G 6. Responding to postpartum hemorrhage with a range of treatments, including:
  - (119)-IV G 6 a) Administration of medication
  - (120)-IV G 6 b) Administration of oxygen
  - (121)-IV G 6 c) Administration of intravenous fluids or appropriate referral for intravenous fluids
  - (122)-IV G 6 d) Treatment for shock
- (123)-IV G 7. Manually removing placenta fragments and/or retained membranes with a sterile, gloved hand
- (124)-IV H. Assesses general condition of mother and newborn by a variety of criteria
- (125)-IV I. Performs catheterization when needed
- IV J. Repairs the perineum by:
  - (126)-IV J 1. Administering a local anesthetic
  - (127)-IV J 2. Performing basic suturing
- (128)-IV K. Provides instruction for care and treatment of the perineum
- IV L. Facilitates breastfeeding by assisting and teaching about a variety of factors impacting breastfeeding, including:
  - (129)-IV L 1. Adequate maternal nutrition
  - (130)-IV L 2. Maternal comfort measures for engorgement

## Core Competencies (MANA Core Competencies for Midwives)

### **I. Guiding Principles of Practice.**

#### **The midwife provides care according to the following principles:**

- 1 H. Midwives recognize the empowerment inherent in the childbearing experience and strive to support women to make informed decisions and take responsibility for their own well-being.
- 1 I. Midwives strive to insure vaginal birth and provide guidance and support when appropriate to facilitate the spontaneous process of pregnancy, labor and birth, utilizing medical intervention only as necessary.

1 J. Midwives synthesize clinical observations, theoretical knowledge, intuitive assessment and spiritual awareness as components of a competent decision making process.

1 K. Midwives value continuity of care throughout the childbearing cycle and strive to maintain continuous care within realistic limits.

1 L. Midwives understand that the parameters of “normal” vary widely and recognize that each pregnancy and birth is unique.

## **II. General Knowledge and Skills**

**The midwife provides care incorporating certain concepts, skills and knowledge from a variety of health and social sciences including, but not limited to:**

2 C. Community standards of care for women and their developing infants during the childbearing cycle, including midwifery and bio-technical medical standards and the rationale for and limitations of such standards

2 E. Significance of and methods for documentation of care through the childbearing cycle.

2 F. Informed decision-making.

2 L. Knowledge of common medical terms.

2 M. The ability to develop, implement and evaluate an individualized plan for midwifery care.

2 N. Woman-centered care, including the relationship between the mother, infant and their larger support community.

2 O. Knowledge and application of various health care modalities as they apply to the childbearing cycle

## **III. Care During Pregnancy**

**The midwife provides health care, support, and information to women throughout pregnancy. She determines the need for consultation or referral as appropriate. The midwife uses a foundation of knowledge and/or skill which includes the following:**

3 B. Education and counseling for the childbearing cycle

## **IV. Care During Labor, Birth and Immediately Thereafter**

**The midwife provides health care, support, and information to women throughout labor, birth and the hours immediately thereafter. She determines the need for consultation or referral as appropriate. The midwife uses a foundation of knowledge and/or skill which includes the following:**

4 A. The normal process of labor and birth.

4 B. Parameters and methods for evaluating maternal and fetal well-being during labor, birth and immediately thereafter, including relevant historical data.

4 C. Assessment of the birthing environment, assuring that is clean, safe and supportive, and that appropriate equipment and supplies are on hand.

4 D. Emotional responses and their impact during labor, birth and immediately thereafter.

4 E. Comfort and support measures during labor, birth and immediately thereafter.

4 G. Techniques to assist and support the spontaneous vaginal birth of the baby and placenta.

4 J. Causes of, evaluation of and appropriate treatment for variations which occur during the course of labor, birth and immediately thereafter.

4 K. Emergency measures and transport procedures for critical problems arising during labor, birth or immediately thereafter.
