The PAP smear/STI sample is required for all students. Not every WW exam will include a PAP smear/STI sample collection. For this reason your preceptor must sign you off on this skill here.

PAP SMEAR/STI SAMPLE COLLECTION SKILL SIGN OFF: I have observed my student practice her collection of PAP smears and STI samples and my signature here indicates her proficiency:

Signature: _____ **Date:** _____

Instructions: The student must perform the clinical skills in the capacity of a primary midwife, to the level of mastery*, all while under the direct supervision* of the preceptor. These clinicals are logged on Clinical Record Sheets and are signed off by the preceptor who directly supervised the experience. Student submits updated forms at the end of each trimester to document progress. Student's and Preceptor's care at the encounter must be reflected on the client's chart via name or initials, in case of A well woman exam consists of most of the following, but is not limited to: Preparation, chart review, complete physical assessment including, but not limited to: Bimanual exam to screen for colorectal and endometrial cancer; pap smear; collection of samples for STIs; breast exam; and counseling on the following items: family planning; prevention and detection of STIs; nutrition and exercise relating to bone density; hormonal changes and physical and mental comfort measures relating to the interconceptual period and menopause; and attention to general social, physical and emotional well-being, charting, and cleanup.

***Mastery** of a clinical skill consists of the competent and confident provision of safe, evidence-based midwifery care for the individual Clinical Skills including: Etiology, sequelae, appropriate management and follow-up for the individual patient, appropriate times and reasons for consult and referral, access to relevant resources and information, complete, thorough and timely record keeping, appropriate, professional, and compassionate management of every task involved, receptiveness and responsiveness to patient's concerns, explanation of midwifery decisions and actions as they relate to possible outcomes and their wider impact, based on the Midwives Model of Care®.

***Supervision:** The preceptor must be in direct supervision of this activity: This means the preceptor was present and in control at all times during the entire activity, catalyzed the important decision making processes, elicited the student's rationales for her/his decisions, and oversaw the student's charting.
